

DrivePro Body 40

Transcend's DrivePro Body 40 is equipped with a Sony sensor and infrared LED lights, allowing it to capture 2K video at 60fps in both day and night settings. Its image stabilization and GPS/GLONASS tracking ensure high precision and stable footage. With an IP68 rating, this camera is built to withstand diverse working environments and offers up to 11 hours of recording time. This makes it an invaluable tool for law enforcement personnel and security guards, providing reliable and high-quality evidence collection during their duties, regardless of the conditions.

Body Cameras

Unparalleled Clarity In Any Light

The DrivePro Body 40 utilizes Sony STARVIS 2™ technology, offering 2K QHD 1440P video at 60fps. It captures dynamic images clearly, presenting detailed layers of the scene. With enhanced sensitivity, it balances areas with insufficient light and intense illumination, delivering high-resolution image quality even in low-light conditions.

Infrared LEDs for Night Vision

The DrivePro Body 40 is equipped with four infrared LEDs that automatically activate in low-light conditions to enhance night vision capabilities. This feature significantly improves recording quality in complete darkness.

Note: Footage recorded with infrared LEDs will be in grayscale.

Image Stabilization

The DrivePro Body 40 comes with electronic image stabilization function (EIS), minimizing the effects of vibration and shaking to produce images with higher stability and precision.

Note: STARVIS 2 is a trademark of Sony Corporation

Body Cameras DrivePro Body 40

Features

- · Connect to mobile devices easily and quickly
- Team sync function facilitates group recording
- when a leader's recording mode is activated • Handy snapshot to take photos while recording a video

DrivePro Body Toolbox allows you to securely manage videos and snapshots, adjust settings, format internal storage, and upgrade firmware.

DrivePro Body App

DrivePro Body App is designed for the DrivePro Body series. Manage camera settings and view recordings from your mobile device.
